REPLY BRIEF UNDER 37 C.F.R. § 41.41

Sir:

Appellant submits this brief for the consideration of the Board of Patent Appeals and Interferences (the "Board") in reply to Examiner's answer mailed June 15, 2006 in this application.

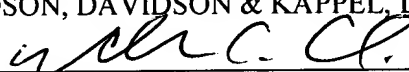

The Examiner's Answer agrees that none of the prior art discloses "A water-soluble, native dry extract consisting essentially of Ginkgo biloba plant part constituents, wherein the extract is produced by ultrafiltration using a filter having an

average molecular weight cut off ranging from 2000 to 10000 Daltons and wherein the extract lacks any solubilization agents" as claimed in claim 11, but argues that "most active compounds in known from Ginkgo biloba have molecular weight less than 2000." However, this completely disregards the claim language and the prior art, which provide not just the active compounds and clearly have "Ginkgo biloba plant part constituents" which have a molecular weight greater than 10000. The products produced by the present invention as claimed and the prior art are different. See the present specification at page 9, line 1 et seq.

Respectfully submitted,
